

JSON-LD Working Group, Web of Things Working Group Joint Meeting

Sebastian Käbisch
September 26, 2024
TPAC 2024

List of discussion topics I / II

- Current working status of the JSON-LD WG
 - RDF-star
 - Example
 - Relevance for TD?
 - YAML-LD
 - Example
 - Shall we allow YAML-LD for TD representations?
 - CBOR-LD
- JSON-LD and canonicalization
 - Where is this specified?
 - What is the status?
 - Topic within DID?

List of discussion topics II / II

- Context file processing
 - apparently the JSON-LD bilt-in compaction algorithm does not treat `rdf:type` and `@type` the same
 - <https://github.com/w3c/wot-thing-description/issues/2041#issuecomment-2299564138>
- JSON Schema for validating TD instances
 - So far, the TD REC only provides informative references to the JSON schema specification (it has never been finalized by the IETF and never will be)
 - However, [Verifiable Credentials JSON Schema Specification](#) uses JSON Schema references normative
 - What is you view on this?
