# Outline

- Work
  - Review work items
  - Is there any critical work needed on Discovery?
  - Are there work items missing?
  - Do we need to reactivate the TF?
  - Who can lead the TF if we do?

# Work Items

## Work Items (prioritized)

### Higher

- Queries: Filters, JSON Path, Sort-by
- New Introductions: MQTT, OPC UA
- Other: Security (e.g. Signing), Validation, TD Versions, Version Selection

### Lower

- CoAP Directory Service
- Geolocation (queries; needs to be coordinated w/ data model in TD)
  - Propose to structure as an additional “query filter”
